1. Online Tariff Introduction

ArcticTARIFF is a comprehensive web-based tariff system for customs-administration authorities in European Union (EU) countries. The system is compatible with EU requirements and provides flexible and comprehensive functionality, also allowing national regulations to be applied.

The Online Tariff is meant for all people who are trading goods with third party countries. The main purpose of the system is to provide accurate and updated data about the EU (TARIC) and national tariff and non-tariff measures through the internet, 24 hours a day and 7 days a week.

This information is made available through a web-interface which does not require any client side applications or browser plug-ins. To start using the Online Tariff, open your browser and enter the relevant URL address into the browser's address bar.

Menu

All facilities in the Online Tariff are available from the main menu:

Home – Tariff home page

Nomenclature – browse and search the Goods Nomenclature

Measures – search for tariff and non-tariff measures on commodities

Calc of duties – calculate duty, lookup exchange rates and search for Meursing codes

Quotas – search for quota status's and balances

Reports – print or download sections of the goods nomenclature tree

More Info – links to other related resources

Help - opens online help in a new window

Print – Creates a PDF file of query results for download or printing. Available in most query screens

Export – Exports query results to an Excel spreadsheet. Available in some query screens

Search Results

Results of searches are displayed in tabular form and can be sorted by clicking table column headings. Large result sets are paged, with 12 results displayed per page. Buttons below the table are used to move between pages.

Measures in the Tariff are sourced from the EU and from the Member State. The origin of a measure is indicated with an EU flag or a National flag.

Query results can be printed or downloaded in a PDF file by clicking the Print link in the top right of the web page.

Language

Language buttons (flags) in the top right of the web page allow the user to change the language used in the Tariff.

2 Nomenclature

2.1 Query by nomenclature

With this option, you can find commodity codes in the goods nomenclature. You can do this by searching for a specific code or by browsing the nomenclature.

Click **Nomenclature** on the menu bar and then click on **Query by nomenclature** in the sub-menu. The following page will appear:

Code	Description	Supplementary unit
I	SECTION I - Live animals; animal products (chapter 1 - 5)	
II	SECTION II - Vegetable products (chapter 6 - 14)	
III	SECTION III- Animal or vegetable fats and oils and their cleavage products; prepared edible fats; animal or vegetable waxes (chapter 15)	
IV	SECTION IV - Prepared foodstuffs; beverages, spirits and vinegar; tobacco and manufactured tobacco substitutes (chapter 16 - 24)	
V	SECTION V - Mineral products (chapter 25 - 27)	
VI	SECTION VI - Products of the chemical or allied industries (chapter 28 - 38)	

This page is divided into two main segments: Search and the Nomenclature tree.

Search

This segment enables you to search for the relevant commodity codes according to the following criteria:

Field	Description
Simulation date	Entering a Simulation date is required when searching for goods nomenclature, narrowing the search to only the nomenclatures that are valid at the specified date. By default, the current date is used.

Trade direction	Select the trade direction i.e. Import, Export or Export refund. By default, it is set to Import.
Commodity code	Enter the commodity code you are looking for; enter 2, 4, 6, 8 or 10 digits.
General information	Shows the links to additional information about the commodity codes or Tariff.
Language	By default, the language displayed is set to the language of your user interface. You can change it to any of the preset languages available in this field.
Expand all search results	When this checkbox is selected, the search results are shown in a fully expanded goods nomenclature tree.

After you have entered the criteria, click on the SEARCH button. Matching codes will be displayed within the goods nomenclature tree in the lower segment of the page.

Nomenclature Tree

This segment displays the goods nomenclature tree, organized in SECTIONS. By default, it is set to the import mode with the current date as the date of query. For each SECTION, you will see the Roman numeral (e.g. "VII"), the title and the chapters contained in the SECTION.

You can browse each SECTION by clicking on the relevant SECTION to expand it and browse for further details by expanding the chapters and nomenclature within it.

Code	Description	Supplementary unit
II	SECTION II - Vegetable products (chapter 6 - 14)	
	Classification Info	
	General rules with comments	
	Explanatory Notes to HS (FAHS) chapter 06 - 14 (Swedish text)	
	Beslut i klassificeringsfrågor	
	Förklarande anmärkningar till KN (FAKN)	
06	CHAPTER 6 - LIVE TREES AND OTHER PLANTS; BULBS, ROOTS AND THE LIKE; CUT FLOWERS AND ORNAMENTAL FOLIAGE	
0601	Bulbs, tubers, tuberous roots, corms, crowns and rhizomes, dormant, in growth or in flower; chicory plants and roots other than roots of heading 1212 TN701	
0601 10	- Bulbs, tubers, tuberous roots, corms, crowns and rhizomes, dormant	
0601 10 10 00	-- Hyacinths	Number of items
0601 10 20 00	-- Narcissi	Number of items
0601 10 30 00	-- Tulips	Number of items
0601 10 40 00	-- Gladioli	Number of items
0601 10 90 00	-- Other	Number of items
0601 20	- Bulbs, tubers, tuberous roots, corms, crowns and rhizomes, in growth or in flower; chicory plants and roots	
0601 20 10 00	-- Chicory plants and roots	
0601 20 30 00	-- Orchids, hyacinths, narcissi and tulips	
0601 20 90	-- Other	
0601 20 90 10	--- Plants (rhizomes in flower) of Colocasia Schott	
0601 20 90 90	--- Other	

The following information is shown in the goods nomenclature tree.

Field	Description
Commodity code	Entering a Simulation date is required when searching for goods nomenclature, narrowing the search to only the nomenclatures that are valid at the specified date. By default, the current date is used.
Folders and search icons	Click on a folder to expand or collapse it. Clicking on a  will show the Measures for the selected commodity code
Links	Clicking a  will display additional notes about a section, chapter or goods nomenclature code.
Description	The goods nomenclature description is displayed in the selected language. Indents (e.g. ---) are displayed to help show the position of each code within the nomenclature.
Footnotes	Footnote codes are displayed after the description (e.g. TN701). Clicking on a footnote code opens a pop-up showing footnote text.
Supplementary units	Where relevant, the applicable supplementary unit (e.g. Litres) is shown for commodities.

2.2 Search by text

With this option, you can find commodity codes, footnotes and additional codes by searching for keywords in their descriptions.

Click **Nomenclature** on the menu bar and then click on **Search by text** in the sub-menu. The following page will appear:

The screenshot shows the 'Search description' interface. At the top is a navigation bar with 'News', 'Nomenclature', 'Measures', 'Calc of duties', 'Quotas', 'Reports', and 'More info'. On the right are 'Help', 'Print', and 'Export' links. The main form has the following fields:

- Simulation date***: A date picker showing '2017-01-12'.
- Search criteria***: A text input field.
- Description type***: Three checkboxes: 'Goods nomenclature' (checked), 'Additional code' (checked), and 'Footnote' (checked).
- Language**: A dropdown menu showing 'English'.
- Search**: A blue button to execute the search.

To start searching for descriptions, enter the relevant criteria into the fields according to the following table:

Field	Description
-------	-------------

Simulation date	The search will display the descriptions that are valid on the date which you have entered as Simulation date. By default, the current date is selected.
Search criteria	Enter the keyword(s) you are searching for. This can also be in a partial form of the word (e.g.air for airplane). The system will perform a search for the keywords in the selected description types.
Goods nomenclature/ Additional code/ Footnote	Select the type of text fields that the search is to be performed on. By default, all the text fields are selected.
Language	By default, the language displayed is set to the language of your user interface. You can change it to any of the preset languages available in this field.

Click on the SEARCH button. The page with the search results will be displayed:

Simulation date* 
Search criteria*
Description type ☒ Goods nomenclature ☒ Additional code ☒ Footnote
Language 

Result of search: 21 descriptions found

Id	Description Type	Description	Detail
CD520	Footnote	Wines of fresh grapes originating in Algeria and bearing a designation of origin must	Detail
CD557	Footnote	Wines of fresh grapes originating in Morocco and bearing a designation of origin must	Detail
CD558	Footnote	Wines of fresh grapes originating in Tunisia and bearing a designation of origin must	Detail
TM609	Footnote	of fresh grapes produced	Detail
TM638	Footnote	be declared. Wines of fresh grapes	Detail
TM639	Footnote	grapes originating in Morocco	Detail
TM640	Footnote	grapes originating in Tunisia	Detail
TM701	Footnote	of fresh grapes not produced	Detail
0806000000	Goods nomenclature	Grapes , fresh or dried	Detail
0806101000	Goods nomenclature	Table grapes	Detail

Each result is indicated by:

Field	Description
Id	The id of the matched goods nomenclature, footnote or additional code

Description type	Indicates whether the matched item in a goods nomenclature code, footnote or additional code
Description	The textual description. The keyword searched for is highlighted.

If there are no valid texts to display in the search result, 'Description not found' will be displayed.

Search term syntax

When doing searches, it is possible to search for multiple words, and combine space-separated words with +,-,OR and "".

Field	Description
Phrase search ("")	By putting double quotes around a set of words you will search for the exact words in that exact order.
Terms you want to exclude (-)	Attaching a minus sign immediately before a word (remember, don't add a space after the -) indicates that you do not want descriptions that contain this word.
Search exactly as is (+)	By attaching a + immediately before a word (remember, don't add a space after the +) you are telling the system to match that word precisely as you typed it. Putting double quotes around a single word will do the same thing.
The OR operator	This is the default behavior in Search and will consider all the words in a search. If you want to specifically allow either one of several words you can use the OR operator.

Examples:

Search text	Search result
automatic vending	The returned search result will include hits with either automatic OR vending in the description.
+automatic +vending	The returned search result will include hits with both automatic AND vending in the description.
+automatic +vending -	The returned search result will include hits with both

food	automaticANDvendingin the description, but exclude descriptions where the word foodis included.
"vending machines"	This will return all description that contains the phrase vending machines.
auto OR vend	This will return all descriptions containing words that containauto, or vend. This is the same as searching forauto vend.

Special characters

Some special characters are part of the search criteria syntax. Current special characters are: + - & | ! () { } [] ^ " ~ * ? : \

To include these special characters in the text you search for, they have to be escaped by using the \ (backslash) before the character.

For example, to search for (1+1):2 use the query: \ (1\+1\)\:2

When clicking on “Detail” link of the search result table, the detail information of selected “Additional code” or “Footnote” will be displayed as following (A list of associated commodity codes for selected additional code/footnote will be displayed in view page also)

View additional code

Additional code	4 054
Start date	23/05/2003
End date	
Footnotes	

Language	Description
en	Musical instruments, between 50 and 100 years old, other than those covered by the additional codes 4008, 4010, 4011, 4013, 4023, 4040 - 4048
sv	Musikinstrument, mellan 50 och 100 år gamla, med undantag av sådana som omfattas av tilläggskoderna 4008, 4010, 4011, 4013, 4023, 4040 - 4048

Result of search: additional code is used in 1 commodity code(s).

2.3 Correlation table

Correlation Table is used for finding new commodity codes with effect from a particular date and also the commodity codes that have expired with effect from a particular date.

Click **Nomenclature** on the menu bar and then click on **Correlation Table** in the sub-menu. The following page will appear:

HOME
Nomenclature
Measures
Calc of duties
Quotas

Query correlation table

Trade direction
☒ Import
☐ Export

Comm. code range start
0101

Comm. code range end

Start date*
11/03/2010

End date

SEARCH

To search for the correlations, enter the relevant data into the fields according to the following table:

Field	Description
Trade direction	Select the trade direction i.e. Import or Export. By default, it is set to Import.
Commodity code range	Enter a complete commodity code range by supplying a start code and an end code (e.g. start 0102, end 0105). Alternatively, enter a single commodity code or partial code (e.g. 0711 00 00 00 or 0301)
Start date	Enter the start date of your search. The results list is limited to the

	codes that existed at that date. This field is mandatory.
End date	Enter the end date of your search. The results list is limited to the codes that existed before the end date.

Query results includes:

- New codes with start date between the query start and end date (inclusive) for Commodity codes within the selected range
- Closed codes with end date between query start date and query end date (inclusive) for Commodity codes within the selected range

Click on the SEARCH button.

The following results page will appear when searching for new commodity codes:

End date:

Result of search: 18 commodities found

Replacement code ↕	Previous code ↕	Date of change ↕	Declarable
0101 90 00 00	0101 90 90 00	01/01/2012	N
0101 30 00 00	0101 10 90 00	01/01/2012	Y
0101 30 00 00	0101 90 30 00	01/01/2012	Y
0101 30 00 00	0101 10 00 00	01/01/2012	N

The results will display expired and new commodity codes for items that fall within the specified commodity codes range. The rightmost field in the list shows if the commodity code is declarable or not.

Query results includes:

- New codes with start date between the query start and end date (inclusive) for Commodity codes within the selected range
- Closed codes with end date between query start date and query end date (inclusive) for Commodity codes within the selected range

3 Measures

3.1 Measures by nomenclature

With this option, you can search for measures that are applicable on declarable commodity codes that start with same numbers as the given commodity code. You can view measure details for the matching commodity codes. This use case is available when you have logged in.

Example 1: Commodity code: 3001 will give measures on all declarable commodity codes that are on same level or below 3001.

Example 2: Commodity code: 3001209 will give measures on all declarable commodity codes that are on same level or below 3001209.

Click **Measures** on the menu bar and then click on **By nomenclature** in the sub-menu. The following page will appear:

To find measures by commodity codes, enter the relevant data into the fields according to the following table:

Field	Description
Simulation date	<p>Entering a Simulation date is required when searching for measures, narrowing the search to only the measures that are valid at the specified date. By default, the field is set to the current date.</p> <p>The simulation date entered can be earlier or later than the system's current date. If the simulation date is later than the current date, a warning about the possible future changes to measures will be displayed.</p>
Commodity code	<p>If you choose to look at the import trade direction, the commodity code you enter must be 10 digits. If you look at the export trade direction, the commodity code you enter must be 8 digits.</p> <p>To lookup a commodity code, click on the  icon. The nomenclature tree will be displayed using the data entered previously - i.e. filtering</p>

	with the simulation date, trade direction and commodity code, if these were filled in the previous page. After you choose the code, it will return to the Query measures by commodity codes page.
Trade direction	Select the trade direction i.e. Import or Export. By default, it is set to Import.
Measure type	Filter results by a measure type. Choose the measure type of your choice from the list.
Country	Filter results by a country. Choose the country of your choice by description or ID.

Click on the SEARCH button to start the search. The following results page will appear:

	R2204/99	2204 10 94 00	With a protected geographical indication (PSI)	Third country duty (103)			ERGA OMNES (1011)		32.000 EUR/Hectolitre	

The measures by commodity codes are displayed in the lower segment of the page.

The following information about each measure type is displayed and by clicking on the links, you can see additional information about each of the fields:

Field	Description
Origin	Shows whether the measure is a <i>national</i> or a <i>TARIC</i> measure in the

	form of a corresponding flag.
Regulation	Shows the role and ID of the regulation associated with the measure. To view the text of the regulation, click on the regulation ID. A separate window with the legal act will be displayed.
Comm. code	Shows the <i>commodity code</i> . Clicking the commodity code will bring you to a separate page where the commodity is displayed in the nomenclature tree.
Comm. code description	Shows the description of the commodity code.
Measure type	Click on the Measure type to view more information about the Measure in a popup window.
Footnote(s)	Shows the <i>footnote type</i> and <i>ID</i> associated with the measure, with an option to view the <i>footnote</i> . Click on the <i>footnote</i> for more information about the footnote, displayed in a popup window.
Additional code	Shows the additional code (type and code) associated with the measure, with an option to view the additional code. Click on the <i>additional code</i> for more information about the code, displayed in a popup window.
Geographical area	Shows the country or region of the measure. If the measure is associated with a country group, the country group is clickable, opening a popup window displaying a list of countries in the group.
Excluded	Shows the countries from the country group that the measure does not cover.
Duty expression	Shows the duty rate for duty measures.
Quota Order No.	The <i>Quota order number</i> that is related to the measure. Click on the <i>Quota order number</i> for detailed quota information, displayed in a popup window.
Conditions	Indicates if there are conditions associated with the measure. Click on <i>View conditions</i> for detailed condition information, displayed in a popup window.

--	--

3.2 Measures for nomenclature

With this option, you can search for measures that are applicable on a certain declarable code. The search can be filtered on additional specified criteria (e.g. additional codes).

Click **Measures** on the menu bar and then click on **For nomenclature** in the sub-menu. The following page will appear:

To find the measures applied to commodity codes, enter the relevant data into the fields according to the following table:

Field	Description
Simulation date	<p>Entering a Simulation date is required when searching for measures, narrowing the search to only the measures that are valid at the specified date. By default, the field is set to the current date.</p> <p>The simulation date entered can be earlier or later than the system's current date. If the simulation date is later than the current date, a warning about the possible future changes to measures will be displayed.</p>
Commodity code	<p>If you choose to look at the import trade direction, the commodity code you enter must be 10 digits. If you look at the export trade direction, the commodity code you enter must be 8 digits.</p> <p>To lookup a commodity code, click on the  icon. The nomenclature tree will be displayed using the data entered previously - i.e. filtering with the simulation date, trade direction and commodity code, if these were filled in the previous page. After you choose the code, it will return to the Query measures for commodity codes page.</p>

Trade direction	Select the trade direction i.e. Import or Export. By default, it is set to Import.
Additional code(s)	Enter additional codes if applicable. This field can be left unfilled. To enter more than one additional code, type a code into the additional code field and click  . To remove an additional code you have entered, click  .
Country	Filter results by a country. Choose the country of your choice by description or ID.
Currency	Choose the currency of your choice for the display of the results.

Click on the SEARCH button to start the search. The following results page will appear:

Code	Description	Supplementary unit
I	SECTION I - Live animals; animal products (chapter 1 - 5)	
II	SECTION II - Vegetable products (chapter 6 - 14)	
III	SECTION III- Animal or vegetable fats and oils and their cleavage products; prepared edible fats; animal or vegetable waxes (chapter 15)	
IV	SECTION IV - Prepared foodstuffs; beverages, spirits and vinegar; tobacco and manufactured tobacco substitutes (chapter 16 - 24)	
V	SECTION V - Mineral products (chapter 25 - 27)	

You will be taken through a series of steps and asked for the relevant details needed for the calculation, clicking NEXT after each step. At any time in the process, you can return to a previous step by clicking the step heading (Commodity, Data etc.).

Note that you can also get to the Calculate process from [Measures for Nomenclature](#), by clicking the Calculate button. When you enter Calculate in this way, you bypass step 1 (Commodity) and go straight to step 2 (Data). Values such as date, commodity code, trade direction, country and additional codes that you have selected in Measures for Commodity will be automatically filled in in the Calculate screens.

Step 1: Commodity

The first step is to select a commodity code

Commodity

SECTION IV - Prepared foodstuffs; beverages, spirits and vinegar; tobacco and manufactured tobacco substitutes (chapter 16 - 24)
CHAPTER 22 - BEVERAGES, SPIRITS AND VINEGAR
Classification Info
Wine of fresh grapes, including fortified wines; grape must other than that of heading 2009
- Sparkling wine
-- With a protected designation of origin (PDO)
-- With a protected geographical indication (PGI)
-- Other varietal wines
-- Other

Enter the following information:

Field	Description
Simulation date	<p>Duties, prohibitions and restrictions can vary over time, therefore a calculation date is required. By default, the current date is used.</p> <p>The simulation date entered can be earlier or later than the system's current date. If the simulation date is later than the current date, a warning about the possible changes to the measure will be displayed.</p>
Trade direction	Select the trade direction i.e. Import or Export. By default, it is set to Import.
Commodity code	Enter the commodity code you wish to use or search for the code using the nomenclature tree displayed in the lower segment of the page.
Language	By default, the language displayed is set to the language of your user interface. You can change it to any of the preset languages available in this field.
Expand all search results	When this checkbox is selected, the search results are shown in a fully expanded goods nomenclature tree.

After entering this information, click NEXT to move to the next step

Step 2: Data

In this step, you provide mandatory information such as customs value, net weight, country and preference code.

Based on the selected GUI: UCC or PRE-UCC, you may be asked for additional parameters. For UCC, the data tab has two additional parameters: Country of preference origin and Procedure code.

Commodity Data Additional codes Documents Units Security Results

Provide mandatory information; customs value, net weight, country of origin and preference code. Based on these, you may be asked for additional information, such as supplementary units, quota order number, additional codes, document codes etc.

Calculation ☒ UCC ☐ PRE-UCC

Commodity code 7223 00 19 00

Customs value* EUR - EURO

Net weight (kg)*

Country of origin --

Country of preferential origin --

Preference code* --

Procedure code*

Duty amount displayed in* EUR - EURO

NEXT

Enter the following information:

Field	Description
UCC / PRE-UCC	Selecting pre-UCC or UCC will determine which regulations the calculation will be based on. Specifically, it will select whether to use UCC or pre-UCC preference code mappings (box 36 / data element 14.7 correlation tables).
Customs value	Enter the customs value of the goods. This is mandatory for imports. Choose the currency of the customs value from the drop-down list (only displayed if more than one currency is available).
Net weight	Enter the net weight of the goods, in kilograms.
Country of origin / destination	Select the country of origin, for import, or country of dispatch, for export.
Country of preferential origin	This must be provided for preferential preference codes (2xx, 3xx), if the country of preferential origin is different from the country of origin.
Preference code	For import, after selecting the country, a list of available preference codes is displayed. Select a preference code from the list. Preference code is not required for exports.
Procedure code	Enter the procedure code value.

Additional fields, such as supplementary units and quota number will appear after you select a country, if they are required:

Security
Results

Documents are required for this calculation. Select from the values below.

☒ **Veterinary control**

The quantity or the price per unit declared, as appropriate, is equal or less than the specified maximum, or presentation of the required document

<input type="radio"/>	N853 - Common Veterinary Entry Document (CVED) in accordance with Regulation (EC) No. 136/2004, used for veterinary check on products (CD624) (CD636) (CD686)
<input type="radio"/>	Y930 - The declared goods are not concerned by Commission Decision 2007/275/EC (CD624) (CD636) (CD686)
<input type="radio"/>	Not presented

☒ **Veterinary control**

Other conditions

<input type="radio"/>	N853 - Common Veterinary Entry Document (CVED) in accordance with Regulation (EC) No. 136/2004, used for veterinary check on products (CD624) (CD636) (CD686)
<input type="radio"/>	Y058 - Personal consignment of a product of animal origin of a non-commercial character, according to Article No 2 of Regulation (EC) No 206/2009 (CD624) (CD636) (CD686)
<input type="radio"/>	Y930 - The declared goods are not concerned by Commission Decision 2007/275/EC (CD624) (CD636) (CD686)
<input type="radio"/>	Not presented

☒ **Import control on genetically modified organisms (GMO) and products containing GMOs**

Other conditions

<input type="radio"/>	C678 - Common entry document (CED) (Regulation (EC) No 669/2009 (O.J. L 194)) (CD686)
-----------------------	---

Document codes and descriptions are displayed, along with footnotes from the associated measures. Click a footnote code to display footnote text in a popup window.

Make a selection from each group of documents, then click NEXT to move to the next step.

Step 5: Units

This step will be displayed if the calculation requires additional values to be supplied. If the calculation can be done without additional values, this step will be skipped.

Commodity Data Additional codes Documents **Units** Security Results

Additional measurement units are needed for this calculation. Please provide the values below

Description	Value
%vol/Hectolitre (ASV#X)	34,6

NEXT

A list of required additional measurement units is listed. You must enter a value for each unit.

Click NEXT to move to the next step.

Step 6: Securities:

If a quota is critical, a security is calculated - the difference between the quota duty and the duty the trader would pay if the quota request is not allocated. In some cases, there may be a choice of basing the security calculation third country duty or on preferential duty; in such cases, the security tab is displayed so that the user can select which of these to base the security calculation on. If only one option is available for the security calculation, this step is skipped.

Commodity Data Additional codes Documents Units **Security** Results

Select the measure to calculate security for

<input checked="" type="radio"/>	Third country duty (150,00 EUR)
<input type="radio"/>	Tariff preference (45,00 EUR)

NEXT

Select the relevant option for the security calculation and click NEXT to view the calculation results.

Step 7: Calculation Results

This screen displays the results of your calculation.

Commodity	Data	Additional codes	Documents	Units	Security	Results
Calculation results						
Simulation date	29.09.2016					
Commodity code	1901 10 00 00					
Additional codes	V001 7010					
Trade direction	Import					
Country	Chile (CL)					
Customs value	2 500,000 EUR					
Net weight (kg)	100,000					
Preference code	100 - Erga omnes third country duty rates					
Measure types / conditions						
	Third country duty					
	Veterinary control CD624 CD636 CD686					
	E - The quantity or the price per unit declared, as appropriate, is equal or less than the specified maximum, or presentation of the required document  N853 - Common Veterinary Entry Document (CVED) in accordance with Regulation (EC) No. 136/2004, used for veterinary check on products					
	Y - Other conditions  N853 - Common Veterinary Entry Document (CVED) in accordance with Regulation (EC) No. 136/2004, used for veterinary check on products					
	Import control on genetically modified organisms (GMO) and products CD680					
	Y - Other conditions  N853 - Common Veterinary Entry Document (CVED) in accordance with Regulation (EC) No. 136/2004, used for veterinary check on products					
	Value added tax					
Calculation of duties						
Origin	Measure type	Regulation	Duty rate	Tax code	Duty amount (EUR)	
	Third country duty	R2204/99	7,600%+ 8,880 EUR/Hectokilogram	A00	190,00	
				A00	8,88	
	Value added tax	1S030498	9,000%	B00	242,90	
Sum excl VAT:					198,88	
VAT:					242,90	
Total:					441,78	

At the top of the page, the values you entered into the calculation are displayed.

Below these, any calculation warnings are displayed; for example, unfulfilled conditions due to missing documents or failed credibility checks.

Below this, a list of measures that were included in the calculation is displayed. Where a measure has a condition (e.g. it requires that a document is provided), details of whether the condition was fulfilled or not are displayed.

means a condition was fulfilled.

means a condition was not fulfilled.

In the lower part of the screen, the payable duties are displayed.

A calculation result can include one or more tariff measures and each measure is displayed in a separate line. The following information about each measure is displayed:

Field	Description
Origin	Shows whether the measure is a national or a TARIC measure in the form of a corresponding flag.

Measure type	Description of the measure type associated with the duty.
Regulation	Shows the role and ID of the regulation associated with the measure. To view the text of the regulation, click on the regulation ID. A separate window will be displayed with the legal act.
Duty rate	The duty expression used to calculate the duty.
Tax code	The tax code associated with the duty.
Duty amount	The amount of duty payable for the measure. Where a measure's duty expression has more than one component, the total calculated for each component is shown separately. For example, if the duty rate is 5.0% + 10.0 EUR/HLT, a value for 5.0% and a separate value for 10.0 EUR/HLT are shown, each with its own tax code.
Total excluding VAT	The total of the duties, excluding VAT.
Total VAT amount	The total amount of VAT payable. This will usually be the VAT payable on the Customs Value, plus the VAT payable for each tariff measure.
Total including VAT	The total of the duties, including VAT.

Standard import value (SIV) or Unit value (UV) calculations

If the calculation result contains Standard import value (SIV) or Unit value (UV) calculations, it will be displayed in tabs:

- The "Normal" tab, displays the calculation results based on normal values (e.g. third country duty or preference duty)
- The "Unit Value" tab displays calculation results based on UV
- The "Standard Import Value" tab displays calculation results based on SIV

4.2 Meursing

With this option, you can find Meursing codes and Meursing duties that are applicable on import of goods containing certain types of milk and sugars covered by Regulation (EC) No. 1216/09.

Click **Calc of duties** on the menu bar and then click on **Meursing** in the sub-menu. The following page will appear:

090045	ERGA OMNES (1011)		01.01.2016	31.12.2016	1 000 000,000	546 489,400	Opened	KGM	No	Detail

In the example above, all Opened tariff quotas defined, as of 29.09.2016, valid for Angola as Country of origin are displayed.

Field	Description
Order number	The unique identity of the quota.
Origin	The country or country group for which the quota is valid.
Excluded	Countries excluded from the country group for this quota.
Start date	The start date of the quota; when it becomes valid.
End date	The end date of the quota; when it ceases to be valid.
Initial amount	The initial amount of the quota
Actual amount	The currently remaining amount of the quota.
Status	The current quota status, which can be: Blocked / Unblocked - Indicates if the quota has been blocked or unblocked. Exhausted - Indicates if the quota has exceeded the initial amount, i.e. has been exhausted.

	<p>Suspended / Unsuspended - Indicates if the quota has been suspended or unsuspended.</p> <p>Opened – Indicates that the quota has recently been opened</p> <p>Reopened - Indicates if the quota has been reopened.</p> <p>Note that the Status column in the search result displays the latest quota status update for the quota. Click Detail to view more information about the quota, including complete status overview.</p>
Unit	The units that the initial and actual amounts are measured in; e.g. Kilogram or Euro.
Critical	Indicates whether the quota is critical or not (Yes/No).
Detail	Click Detail to view detailed quota information.

The Quota detail page has three tabs i.e. Balances, Status and Associated commodity codes:

The initial view displays the Balances tab page, showing the changes to the quota balance, sorted by date.

Balances	Status	Associated commodity codes
Order number	090045

06.07.2016	559 644,000
15.06.2016	577 504,000
13.06.2016	596 555,000

The Status tab page shows all status changes for the selected quota, sorted by date.

2 statuses found

Event date	Change date	Event type	Period	Reason	Critical state
01.01.2016	01.01.2016	Suspended	01.01.2016 - 31.12.2016	No certificate issued	
01.01.2016	01.01.2016	Opened			

The associated commodity codes tab pagelists all declarable commodity codes (including descriptions) that are associated with the specified tariff quota. Clicking on a commodity code will take you to the Measures for nomenclature screen for that commodity.

11 associated commodities found

Commodity code	Description
1704 90 30 00	White chocolate
1704 90 51 00	Pastes, including marzipan, in immediate packings of a net content of 1 kg or more
1704 90 55 00	Throat pastilles and cough drops
1704 90 61 00	Sugar-coated (panned) goods
1704 90 65 00	Gum confectionery and jelly confectionery, including fruit pastes in the form of sugar confectionery
1704 90 71 00	Boiled sweets, whether or not filled

6 Reports

6.1 Printed TARIC

With this option, you can generate a printed list (in PDF format) of TARIC commodity codes.

Click **Reports** on the menu bar and then click on **Printed TARIC** in the sub-menu. The following page will appear:

The screenshot shows the 'Printed TARIC' page with a search form. The form includes two input fields: 'Simulation Date*' with a calendar icon and a date of 2017-01-13, and 'Commodity Code*' with a magnifying glass icon. A blue 'Search' button is located below the fields. The top navigation bar includes links for News, Nomenclature, Measures, Calc of duties, Quotas, Reports, and More Info, along with Help, Print, and Export options.

To generate the report, enter the relevant data into the fields according to the following table:

Field	Description
Simulation date	Enter the date you want to search on. By default, the field is set to the current date. This field is mandatory.
Commodity code	Enter the commodity code you wish to print. It is possible to print a report for one chapter or part of a chapter. This field is mandatory.

Click on the SEARCH button to start the search. The following results page will appear:

Simulation Date*

29.09.2016

Field	Description
-------	-------------

Relief code	Relief code identity.
Start date	The start date for the relief.
End date	The end date for the relief.
Description	Textual description of the relief code.

Click **Print** on the menu (top right) to generate the list in the form of a PDF file, which you may download or print.

6.3 Measure report

This menu is only available for logged in user, who has role `taMeasureLogManager`. With this option, you can query all actual measures not declarable, based on any combination of any attributes of a measure, including dates, commodity codes, country, measure types, additional codes, certificates and footnotes.

Click **Reports** on the menu bar and then click on **Measure report** in the sub-menu. The following page will appear:

Field	Description
Start date	Enter start date you want to search on. This field is mandatory.
End date	Enter end date you want to search on. This field is optional. If the end data is supplied, measures are returned that are valid between the start and end dates (inclusive). If the end date is not supplied, measures are returned that are valid on the start date.
Comm. code range start	Enter the commodity code range start you wish to search. It is possible to search for one chapter or part of a chapter. 2,4,6,8 or 10 digits can be provided. This field is mandatory.
Comm. code range end	Enter the commodity code range end you wish to search. It is possible: 2,4,6,8 or 10 digits. This field is not mandatory. If end commodity is provided, measures are returned that have commodities between the two commodities (inclusive). If end commodity is not provided, measures are returned for the start commodity and all of its children.
